

2411 PELORIS

2.4 Meter Motorized Vehicle-Mount Antenna

3 Piece Reflector Option - Stowed

The Sat-Lite Technologies Model 2411 vehicle-mount 2.4 M antenna offers the most robust, light-weight and compact antenna of its type and size available. This antenna features a carbon fiber composite reflector and backbeam structure designed to provide exceptional performance along with a custom-designed elevation-over-azimuth cable drive pedestal to reduce vehicle mounting space.

The antenna is designed to meet international performance specifications for commercial or military applications and is readily available in C, X, Ku and/or Ka band frequencies. Multiple feed configurations are available. The antenna is available with multiple controller configurations that include manual jog control, autolocate with peaking options, and full tracking capabilities with beacon receiver.

- **Intelsat and Eutelsat Compliant (Using appropriate feed)**
- **Multi-Band C, X, Ku or Ka band Frequencies**
- **Multiple Integration Options**
- **Integrated Controller with Tracking Options Available**
- **Carbon Fiber Reinforced Polymer Structure – Lightweight and Stiff**
- **Low Profile and Space-Optimizing Stow Position**
- **Cable Drive Positioning System**
- **Superior Stability in Wind**
- **Excellent Reliability**
- **Minimal Maintenance**
- **Single or 3 Piece Reflector Option**

Radial Ice (survival)	1 in (25.4 mm)
Corrosive Atmosphere	As encountered in coastal and/or industrial areas

* Using appropriate tracking controller ** Contact Factory

1 Dependent on vehicle capabilities

2 Dependent on mounting position relative to elevation axis

3. For dual waveguide runs, standard travel is ±150°.
