

2421 Agilis

2.4 Meter Carbon Fiber Flyaway Antenna

- **Intelsat / Eutelsat Compliant (with Appropriate Feed)**
- **Multi-Band C, X, Ku, and Ka band Frequencies**
- **Integrated Feedboom**
- **Compact Packaging**
- **Superior Stability in Wind**
- **Excellent Reliability**
- **Minimal Maintenance**
- **Less than 15 min Assembly Time**
- **Captive Hardware**

The Sat-Lite Technologies Model 2421 Agilis Carbon Fiber Flyaway Antenna offers superior performance in a lightweight, portable package. This antenna features a 9 piece carbon fiber segmented reflector designed to provide high gain and low cross pol characteristics. The standard antenna is designed for extremely rugged use and packs 6 high performance all weather cases. Optional package configurations are available. The tripod features a user friendly interface to allow for easy positioning and peaking on a satellite. In addition, the antenna components are modular in design which provide simple options for motorization and tracking requirements. The antenna can be assembled by a single person in 15 minutes or less.

The antenna is designed to meet international performance specifications for commercial / off-the-shelf applications and is readily available in C, X, Ku, and Ka band frequencies. Multiple integration packages are available with a quick change / quick pack configuration of the feedboom. The integrated boom assembly with BUC and LNB packs in a single case for easy and quick installation or packing.

Mechanical / Environmental Specifications

Reflector	2.4 meters (96 in) Carbon Fiber
Reflector Configuration	Parabolic Single Offset, 0.8 F/D (9 piece)
Antenna Travel	
Azimuth	360° with fine adjustment
Elevation	5 - 90° of reflector bore sight
Polarization	± 90°
Antenna Packaging (Std 6 Cases +RF)	Packed Weight Including Cases
Pedestal Hub Case	56 Kg (124 lbs) 26 x 26 x 23 in
Pedestal Backbeam Case	54 Kg (120 lbs) 45 x 25 x 17 in
Pedestal Leg / El Strut Case	65 Kg (142 lbs) 45 x 25 x 17 in
Reflector Cases (3), Rotomolded With Wheels / Handles	36 Kg (80 lbs) Ea. - 39 x 36 x 12 in
Integrated Feed and Boom Packages with Amps	Per Band - Typical 36 Kg (80 lbs) 45 x 25 x 17 in
Temperature	
Operational	-30 to 60°C (-22 to 140°F)
Survival	-40 to 70°C (-40 to 158°F)
Pointing Loss (operational winds)	2 dB peak (Ku-band Rx)
Winds	
Operational	30 Gusting to 45 mph (40 kph G 72 kph) with ballast or anchors
Survival	60 mph (96 kph) with tie downs / any position
Rain	
Operational	2 in/h (5 cm/h)
Survival	4 in/h (10 cm/h)
Relative Humidity	0 - 100% (condensing)
Solar Radiation	360 btu/h/ft ² (1000 Kcal/h/m ²)
Radial Ice (survival)	1/2 in (12.7 mm)
Corrosive Atmosphere	As encountered in coastal and/or industrial areas

Performance dependent on proper installation and ballast/anchors

Feedboom Mounted Integration Dependent on position of weight

Note: Specifications subject to change without notice
